

# How to draw a Minke Whale

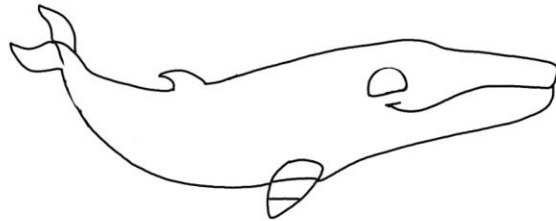

Step 1: Start by drawing a long oval shape.

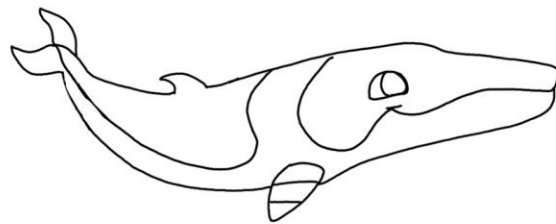

Step 2: Add a curved triangle shape to the back of the oval, and a curved rectangle to the front of the oval.

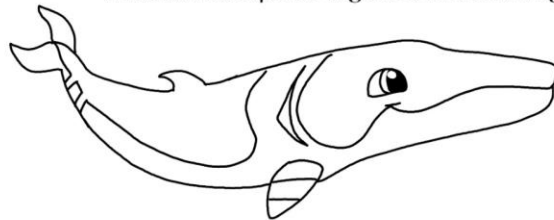

Step 3: Add a small curved triangle to the back, the belly, and two on either side of the triangle that makes up the tail. Erase excess lines.

Step 4: Draw a line that dips down then back up for the mouth. Draw a half oval for the eye. Add a second line to the flipper.

Step 5: Add a curve connecting the mouth to the top of the head. Add a curved shape starting at the tail and curving up after the fin.

Step 6: Draw in circles for eye details. Add in triangle detail after head shape. Erase parts of the tail marking to make a square shape.
